Marondera University of Agricultural Sciences and Technology Showcases at FILDA 2026, Luanda

Marondera University of Agricultural Sciences and Technology (MUAST) was represented at the 41st *Feira Internacional de Luanda* (FILDA 2026), Angola's largest international trade and multi-sector exhibition. The fair ran from 21 to 26 July 2026 at the *Zona Económica Especial* (ZEE) Luanda and was held under the theme, "Produce and Innovate Locally, Win Globally."

As Angola's premier commercial event, FILDA is regarded as "a gathering point for national and foreign operators and partners, a showcase for Angola's capabilities and potentials". MUAST used the platform to market its academic programmes and research strengths in agriculture, agro-processing, engineering and technology. The University engaged with prospective students, partners and industry stakeholders. The exhibition also created space for new institutional linkages. On the sidelines of the fair, the Ministry of Higher and Tertiary Education, Innovation, Science and Technology Development and representatives from 10 Zimbabwean Institutions held several high-level meetings with Angolan institutions. These engagements identified possible areas of collaboration between Zimbabwean and Angolan institutions.
