

MUAST Takes African Indigenous Vegetable Seeds Closer to Farmers Across Zimbabwe

Farmers can now access quality seeds of African Indigenous Vegetables (AIVs) through selected Farmbiz and Profarmer outlets, following a strategic partnership between Marondera University of Agricultural Sciences and Technology (MUAST), and leading agricultural input suppliers. Popular AIVs such as amaranth, spider plant and African nightshade offer opportunities to improve household nutrition, strengthen food security and create sustainable income through vegetable production.

⚲ FIND AIV SEEDS NEAR YOU:

Bulawayo – Farmbiz

Gweru – Farmbiz

Kadoma – Profarmer

Harare – Farmbiz

Macheke – Farmbiz

Rusape – Profarmer

Mutare – Farmbiz and Profarmer

Marondera – Farmbiz and Profarmer

Through AIVI, MUAST is championing research, quality seed production, farmer training, value addition and market development to transform traditional African Indigenous Vegetables into thriving commercial agricultural enterprises.

Farmers, agribusinesses and agricultural stakeholders: Take advantage of this opportunity and be part of the AIV revolution!
