

## MUAST and Enactus Zimbabwe Seal Strategic Partnership

The Marondera University of Agricultural Sciences and Technology (MUAST) and Enactus Zimbabwe signed a landmark Memorandum of Understanding (MoU) at the CSC Campus in Marondera on 12 February 2026. The agreement formalised collaboration to empower students through entrepreneurship, innovation, and sustainable development initiatives.

The ceremony brought together Professor Justice Nyamangara, the University's Vice Chancellor, the University's Executives and Heads of Departments, and the Executive Director of Enactus Zimbabwe, Mr. Tinashe Mushonga. The MOU is designed to promote student-led entrepreneurial projects, enhance learning opportunities through innovation-driven initiatives and ensure MUAST's participation in Enactus national and international competitions.

Speaking at the event, Professor Nyamangara and Mr Mushonga spoke with one voice and emphasised the importance of equipping students with entrepreneurial skills that complement academic excellence, thus producing a wholesome young leader who can transform communities through sustainable projects.

This partnership positions MUAST students to become entrepreneurial leaders and social innovators, contributing to Zimbabwe's development agenda while gaining global exposure through the Enactus network.
